and Comment**☐ **For Bids Due****COMMENTS:**

Mr. McDonald,

We have reviewed the enclosed plan with Mark Edsall and the Planning Board. We are trying to determine the proposed water main requirements as follows:

1. Our entrance one Route 32 is midway between existing hydrants.
2. We will combine one water service for parcels 'A' & 'C'.
3. Will a hydrant be required, and if so, can it be partially up the shared drive?
4. Do you possibly have flow data for the existing hydrants on Route 32?

Thank you for your time and assistance in this matter. Feel free to contact our office for any clarification.
